

Release Notes Nexelus 2024.1 Service Pack 2

Date: December 27, 2024

Introduction

We are delighted to announce the release of Nexelus 2024.2 Service Pack 2. This release incorporates enhanced functionality. Details on enhancements and updates are provided below.

Enhancements and New Features

Media Plan - Flighting Details in Placement Grid

To streamline and provide easier access to flighting information, a visual indicator, a dedicated popup to edit flighting is provided in this release. In addition, the media plan bulk sheet is enhanced to provide read-only flighting information within the bulk sheet.

The following changes have been incorporated within the vendor placement grid:

- Added visual indicators in the placement grid for manual and automatic flighting.
- Tooltips now display flighting information on mouseover.
- Introduced a popup for editing flighting details directly from the placement grid.
- Validations added for flighting consistency with placement and media plan dates.

For more information on how to implement or utilize this feature, please reach out to your Nexelus consultant.

Ad Tech Markup Configuration

Functionality to markup Ad-Serving (Ad Tech) Fees is provided with this release. For more information on how to implement and utilize this feature, please reach out to your Nexelus consultant.

Billing by Media Category/Type

- Based on the configuration, Nexelus now allows users to create separate billing schedules by media category/type within a single media plan. This functionality is supported for both Pre-billing and Reconciliation billing methods. For more information on how to implement and utilize this feature, please reach out to your Nexelus consultant.

Release Notes Nexelus 2024.1 Service Pack 2

User-Defined Fields (UDFs) in Proposals

Media plan based UDFs and naming convention support has been provided using excel import/export bulk sheets in Proposals UI of Vendor portal and planner interface. For more information on how to implement and utilize this feature, please reach out to your Nexelus consultant.

Self-Approval Restrictions

In this release of Nexelus, the Time and Expense approval module has been updated to prevent users from approving their own timesheets and expense reports.

Enhanced Filtering for RFP and Proposal List UI

System configuration has been enhanced to list RFP and Proposals relevant to the logged in user by default, with ability for expanded search. This reduces the size of the list for the logged in user by default.

Media Paid by Client Functionality Enhancement

A new flag has been added in the Client Profile UI to deactivate vendor records to allow for change in policy, please note that change of setting will only be applicable for future media plans and will not affect current or past media plans. For more information on how to implement and utilize this feature, please reach out to your Nexelus consultant.

Fixes and Minor Updates

- Resolved inconsistencies in client-facing charges due to missing Ad Tech markup.
- Enhanced the export process to ensure better readability and optimized file sizes.

Browser Information

The following browsers are supported by this release.

Windows

- Edge 42.17134.1.0
- Firefox 65.0.2
- Chrome 74.0.3729.169
