
Release Notes 12.6

Introduction

We are delighted to announce the release of Nexelus 12.6. This release incorporates new and enhanced functionality along with minor updates and bug fixes. Additional details on enhancements and updates are mentioned below.

New Functionality/Enhancements:

Campaign UI Enhancements

Nexelus will now allow users to approve multiple Media plans at once from “Media Plan(s)” tab under Campaign UI, User can select multiple plan(s) with same level of approval to approve in one go.

Media Plan UI Enhancements

- a. A new **group rule** has been introduced under “Media→ Media Plan→ Hide Close Button” to hide the close button on Media Plan UI, this allows for restricting the closing of a Media Plan to specific user groups.
- b. Nexelus will now show an indication whether the Job is approved or not on Media Plan and Campaign UI.
- c. On Media Plan UI an icon is displayed next to the Ad-Server Campaign ID if there were errors during last sync or if the plan was partially synced due to errors. This is to visually indicate that a follow-up is needed to address errors.
- d. Nexelus now shows external (GOOGLE CAMPAIGN MANAGER/Sizmek) Advertiser ID along with the name on the Media Plan UI.
- e. Nexelus allows for designating a service type as “ad server required”, this way the system proactively asks the user to select an Ad-Server (GOOGLE CAMPAIGN MANAGER / Sizmek).
- f. Nexelus now allows to pull landing pages defined already on the Google Campaign Manager (Ad-Server) and assign at appropriate levels/fields.
- g. New optional feature “Incremental upload” has been introduced in Media Plan UI, Incremental upload will allow user to use bulk-sheet with additional packages/placements. Previous versions of Nexelus required that the entire media plan to be uploaded when making incremental changes.
- h. This version of Nexelus will allow users to create media plan with unmapped sites and then vendor can be mapped later before issuing IO, and application will send an email to selected users when site is mapped to the actual vendor.
During bulk sheet import, application will show confirmation dialog along with the unmapped sites that “this bulk sheet includes unmapped sites, press Ok to continue”.
- i. On Media Plan UI; Change log has been introduced for all available tabs and system will maintain/log every change which is being made by users. User can view change log by clicking on “View Change Log” button available on each tab of Media Plan UI.

Release Notes 12.6

- j. On Media Plan UI; Export to Ad Server check box has been introduced at placement level, which will allow user to exclude placement from syncing to ad server, this option is available in bulk-Sheet as well.
- k. On Media plan import/export; New Company Rule has been introduced in the system with the name "Mandatory Dummy ID for placement/Ads" to enforce the usage of Dummy ID's during bulk-sheet upload of the media plan.
- l. Flighting in GOOGLE CAMPAIGN MANAGER: Nexelus now allows users to manage GOOGLE CAMPAIGN MANAGER flighting from within Nexelus media plan UI if Automatic flighting is turned off for placement/package.

Buying UI Enhancements

- a. Error messages have been enhanced with additional information to users, especially where system is not allowing to create / revise IO. For example, preventing IO revision below the amount (vendor invoice) that has already been received.
- b. Nexelus now shows voucher number(s) and its status "posted/unposted" on tool tip of received amount.
- c. Nexelus has introduced Yahoo and Bing integration which will allow users to create Yahoo Campaign and Bing Insertion Order from Nexelus. Please contact your designated consultant if you want to enable these features.

Delivery Override UI

New Company Rule under "Data Entry → Delivery Override → Display Weighted Media Spend" is introduced to display weighted media spend based on filter dates. This is applicable to placements that are cutting over month(s). Please consult your designated consultant to enable this feature.

Billing Setup UI

In this version of Nexelus a New Company rule has been introduced under "Billing Rules → Billing Setup → Search record limit" to control the search results.

Media billing UI has been enhanced with the following options where user can select any of the options to generate invoice(s).

1. Invoice per campaign
2. Invoice per media plan
3. Invoice per client billing line

Media Payable Matching

Release Notes 12.6

Nixelus now shows an icon next to the IO number if IO needs to be revised based on revised/updated media plan.

Employee UI Enhancements

While deactivating any employee, Nixelus will prompt the user to replace the existing employee with the new resource if existing employee is part of any level2/level3 (project/activity) resources.

Minor Updates

Following minor updates have been made as part of this release upgrade:

1. Notification emails with links are enhanced to redirect user to their respective UI's with relevant data loaded in the UI.
2. "Forgot password" functionality has been introduced in this version of Nixelus and this feature will be available based on Nixelus Authentication mode only.
3. A new group rule has been introduced under "Billing Rules → Invoice → " to control the "Print as Final" and Invoice posting actions at user group level. This rule allows administrators to control who can print an invoice as final and post to AR.
4. Minimum / Maximum Fee fields are now available on Tiered Rate UI.
5. Minimum / Maximum Fee and Tiered Rate fields are now available on Management Fee Rate UI.
6. The company rule has been updated to make the "Description" field Mandatory on Media Plan UI. If the rule value is set as "Yes" application will change the color of the Description field to Red and make this field mandatory for Media Plan UI. In case of "No" Description field will not be considered as Mandatory.
7. Nixelus now shows an indication icon in the buying UI next to the IO number in case IO needs to be revised due to a revision of media plan as the spend amount may have changed for the vendor in question.
8. Nixelus now displays AdWords Account **Name** as compared to the ID in the buying UI.
9. On Billing setup UI paging has been introduced. As such, a "Select All" check box has been introduced that allows user to select all records on the current page or all records on all pages based on the search criteria.

Release Notes 12.6

Fixes

Following minor fixes have also been made part of this release upgrade:

1. Currency conversion issue related to an inter-company expense report in specific scenarios has been addressed
2. "Media paid by client" checkbox on level3 popup was not reflecting the correct value after save. This issue has been addressed
3. Special char in vendor id was causing an issue; this has been fixed
4. There was an issue with media plan name being chopped off on the Media Payable Matching detail section. This issue has been addressed

Note: Multiple sessions of NEXELUS® application in different tabs of a browser or in separate browser windows cannot be maintained. This may cause data corruption issues.
