NetSuite Oracle

NetSuite Oracle Training – Completed basic training on NetSuite, focusing on Saved Searches and fundamental ERP functionalities.

2022
(March–August)

Revolution Technology

Web Development Intern

At Revolution Technology, I completed a six-month internship, working with HTML, CSS, JavaScript, React.js, and PHP. I assisted in developing and maintaining web applications, collaborating with senior developers on feature implementation and code reviews.

2022–2023
September–August

Develop Together

.NET Developer

At Develop Together, I worked as a .NET developer for a year, contributing to several products. I developed web applications using ASP.NET Core, built dynamic UIs with Razor views, and enhanced user interactions with AJAX and JavaScript. On the backend, I managed data operations with Entity Framework Core, integrated RESTful APIs to fetch data, and ensured data security and integrity.

2023– 2025
September–Present

ByteTech Solutions

.NET core Developer

At ByteTech Solutions, I have been working as a .NET Core developer for over 1.5 years, contributing to multiple projects, including an ERP solution built from scratch. I develop responsive UIs with Razor views and AJAX, manage data operations using Entity Framework Core, and integrate APIs for seamless functionality. I also handle software maintenance, security, and scalability while collaborating with teams to deliver high-quality solutions.
