## Release Notes Nexelus 2024.1 Service Pack 3

**Date:** March 5, 2025

### Introduction

We are delighted to announce the minor release of Nexelus 2024.1 Service Pack 3. This release incorporates enhanced functionality. Details on enhancements and updates are provided below.

### Nexelus

- **Flighted Placements - Import/Export Functionality:** A new feature has been added to Nexelus to allow users to a flighting specific bulk sheet to maintain flight details. The new functionality enhances efficiency by reducing manual effort and minimizing errors in flighting placements.
- **Programmatic Buying Integration with The Trade Desk (TTD):** We have introduced a configurable option for users to include or exclude Programmatic margins when pushing campaign budgets to TTD. This allows users to maintain margins in TTD platform, while Nexelus enforces proper spend limit (buying) and accurate billings to Client.
