
Release Notes – Nexelus 2022

Introduction

We are delighted to announce the release of Nexelus 2022. This release incorporates new and enhanced functionality. Additional details on enhancements and updates are mentioned below.

New Functionality/Enhancements:

Revenue Recognition Based on Schedule

This enhancement allows one-time setup of the revenue schedule for the life cycle of the project. The schedule and amounts can also be adjusted thereafter. This allows easy setup especially for Milestone based revenue recognition projects.

Please contact your designated consultant if you have any question or would like to implement this functionality.

Revenue Recognition UI Enhancement

In this version of Nexelus we have added new filters to provide enhanced control of the revenue recognition process. Users can run revenue recognition batch based on client, department and/or location filters.

Project (Job) Inquiry UI Enhancement

A revenue recognition section has been added to the project inquiry UI which displays summarized information on revenue recognized.

Please contact your designated consultant if you have any question or would like to configure this UI enhancement functionality.

eSignature (*Adobe Sign and DocuSign*)

To expedite the signature process for approving estimates and media authorizations with proper document management audit trail, Nexelus has added the Electronic Signature feature. This new feature will allow users to send estimates and MAs to clients for eSignature through DocuSign or Adobe Sign. This new feature is also available for Insertion order(s) and Purchase Order(s).

Please contact your designated consultant if you have any question or would like to implement this functionality.

Release Notes – Nexelus 2022
