

Introduction

We are delighted to announce the release of Nexelus 12.9. This release incorporates new and enhanced functionality. Additional details on enhancements and updates are mentioned below.

New Functionality/Enhancements:

Moving from AdWords API to Google Ads for budget order and delivery.

This is an enhancement to our current integration with Google, as recommended by Google.

Excel integration.

In this version of Nexelus, Excel integration has been enhanced by using latest and improved technology for Excel Import and Export.

External File storage (AWS and MS One Drive).

In this version, Nexelus has introduced AWS and MS One Drive integration which will allow users to use their own corporate accounts (cloud based) for document management.

Please contact your designated consultant if you have any question or would like to implement this feature.

Media: Projected Budget Amount restriction.

New Company rule has been introduced to notify and/or prevent users from saving media plans if they are exceeding the total (Projected) budget amount defined at the campaign level. Furthermore, based on the rule definition system will make projected budget amount field mandatory on the campaign UI.

Delegation restriction.

A new group rule has been introduced which will restrict proxy user from approving timesheet and expense reports. Similarly, system can be configured to prevent approvals across various functions (Estimates, Media Plans, etc.) for the proxy user. .

Please contact your designated consultant if you want to enable this feature.

Twitter Campaign Creation from Nexelus

This version of Nexelus allows users to create Twitter campaigns from the buying screen. Please contact your designated consultant if you have any question or would like to implement this

functionality.

Post-Pay Billing Adjustment by Vendor

This functionality has been enhanced to allow users to reconcile/adjust post-pay billing at the vendor level without having to wait for all vendor invoices for the given month of service..

Please note that this feature is only applicable for post-pay Media billing. Please contact your designated consultant if you have any question.

Budget (Production Estimate) UI Enhancement

Enhanced search option is added to this user interface to provide total amounts for the latest version and the last approved versions of estimates.

Please contact your designated consultant if you have any question or would like to implement this feature.

Media Vendor Invoice

A validation check has been introduced to address a scenario where the insertion order is not revised while the vendor spend has been reduced and approved in the latest version of media plan. This validation check has also been applied to the voucher (vendor invoices) posting functionality as well.

Minor Updates -

1. Media plan and campaign lookups have been enhanced to display full media plan and campaign names.
2. Media Vehicle Tab: Vendor Code will show along with Vendor name in the media vehicle tab.
3. Delivery bulk-sheet: IO number column has been added at the end of delivery bulk-sheet export for information purposes.
4. Posted Transaction UI has been enhanced to display vendor Invoice number for vendor expense transactions.
5. Contract level billing functionality has been enhanced to allow users to bill "T&M & Fixed Schedule" and "PREBILL and Fixed Schedule" on the same invoice respectively.

Fixes.

1. Saving issue with compatibility dropdown in media plan has been addressed, this was happening if user updates compatibility dropdown after saving the media plan.
2. Issue with Facebook integration has been addressed where system was not allowing user to cancel Facebook campaign.

3. Issue with Pending estimate approval gadget has been addressed where system was not displaying correct approval status on the dashboard gadget.
4. An issue with post-pay media billing has been addressed where the system was duplicating billable amount when the same vendor is mapped to additional sites.

Note: Multiple sessions of NEXELUS® application in different tabs of a browser or in separate browser windows cannot be maintained. This may cause data corruption issues.
