
Release Notes APWorks 2025.1 Service Pack 1

Date: June 11, 2025

Introduction

We are excited to announce the next release of **APWorks 2025.1 Service Pack 1**. This release includes several functionality enhancements aimed at improving user experience, efficiency, and system performance. Details of the updates and enhancements are outlined below.

- **Split Line Functionality Enhanced**
 - The **Split Line** feature on the Invoice UI has been improved to enable users to allocate specific amounts to each Insertion Order, offering greater flexibility and precise control over invoice distribution.
- **Editable Dates on PDF-Based Broadcast Invoices**
 - Dates on PDF-based Broadcast Invoices are now editable based on group rule, giving users more flexibility to adjust billing details
- **Discrepant Gadget Search Issue**
 - Resolved an issue where users were unable to search by the **Routed To** field in the **Discrepant Gadget**.
- **Close Button Placement on Invoice UI**
 - The **Close** button on the Invoice UI has been repositioned to follow standard UI conventions, improving consistency and user experience.
- **Updated Default Filter for Gadgets and Reports:**
 - Gadgets and reports will now display **all available data** when no filters are selected, removing the previous 9-week restriction.
- **Enhanced Mediaocean Posting Workflow**
 - Users can now view all invoices generated during the Mediaocean posting process, with visibility into which were posted successfully. Failed invoices can be individually reviewed and reposted, allowing for faster and more controlled error handling.

Browser Compatibility

The following browsers are supported with this release:

Windows

- Microsoft Edge 42.17134.1.0
- Mozilla Firefox 65.0.2
- Google Chrome 74.0.3729.169
