## Release Notes 2023.01.01

### Introduction

We are delighted to announce the release of Nexelus 2023.01. This release incorporates enhanced functionality. Details on enhancements and updates are mentioned below.

### Nexelus:

#### 1. Data Filter Rule for Media:

In this version of Nexelus, Data filters have been enhanced for Media Module, these filters will allow companies to restrict data access for users based on their roles under tagged to Campaigns and Media Plans.

Please contact your designated consultant if you have any questions or would like to implement this feature.

#### 2. Project/Job UI Change.

The Project setup user interface has been enhanced to allow users to unlink the Contract/SOW from Project. Please note that system will allow unlinking only if there is no transactional data for that specific Project.

#### 3. Vendor RFP UI Changes

RFP user interface has been enhanced with following enhancements:

- a. The placement section now supports selection of multiple dimensions at the placement level.
- b. The placement section has been enhanced to support multiple attachments. This enhancement will allow users to attach multiple attachments along with comments for vendor's review.

Please contact your designated consultant if you have any questions.

#### 4. Vendor Proposal Enhancements

- a. The placement section now supports selection of multiple dimensions at the placement level.
- b. The placement section has been enhanced to support multiple attachments. This
